DETAILED ACTION

1. Claims 7-20 have been added by Applicant. Claims 1-20 are pending.

Response to Arguments

2. Applicant's arguments filed February 26, 2007 have been fully considered but they are largely not persuasive. Applicants have argued that Bogin does not teach reporting to the operating system the portion is reserved because it is the operating system that allocates the memory. Examiner disagrees that these might be mutually exclusive; if the memory as allocated has a reserved portion, then that portion is reported to the operating system as reserved by virtue of the operating system only allowing such reserved use of the portion when accessed.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, 4, 5, 7-10, and 16-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Bogin et al (US Patent # 6,192,455), herein **Bogin**.

- a. As per Claims 1 & 4, **Bogin** discloses a method of configuring resources in an IA-32 computer and a machine-readable storage or transmission medium containing code that, when executed on a computer, causes the computer to perform said method [**Column 2, Lines 58-67**], the method comprising:
establishing a remap window at the top of physical memory [**Figure 2c, #127 &**

Column 4, Lines 29-45], the remap window corresponding to a PCI memory address range below 4 GB **[Column 3, Lines 3-30]**; and reporting to an operating system that a portion of the remap window is reserved, the reserved portion corresponding to an AGP aperture within the PCI memory address range **[Column 4, Lines 9-17 & Column 5, Lines 43-62]**.

- b. As per Claims 2 & 5, **Bogin** further discloses the method of claim 1 and the storage or transmission medium of Claim 4, respectively, further comprising: reporting to the operating system that the remainder of the remap window is usable memory **[Column 5, Lines 43-62]**. Examiner understands that **Bogin's** non-SMRAM memory areas are reported as usable while SMRAM memory areas are unusable and reserved, as taught in Column 1, Lines 15-28 & 53-58.
5. As to claims 7 and 16, reporting an inaccessible portion is disclosed since AGP addresses that remap to SMRAM space are redirected.
6. As to claims 8 and 17, reporting the window reserved during boot is disclosed since that is when the memory space is allocated.
7. As to claims 9 and 18, reclaiming a portion of the PCI range is disclosed since AGP accesses will be remapped to main memory space (except for SMRAM space).
8. As to claims 10 and 19, reporting space reserved includes that an owner is unassigned is inherent since the AGP space is not assigned to any owner.

Allowable Subject Matter

9. Claims 3, 6, 11-15, and 20 are allowed.

Conclusion

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
